

Advanced Spinal Rehabilitation Center

“The leading Northwest center for non-surgical treatment of scoliosis.”

PATIENT APPLICATION FORM

WELCOME TO OUR CLINIC. We specialize in assisting our patients to achieve their optimal level of health through our spinal and postural corrective programs. Our research-based approach is very unique and advanced even when compared to other rehabilitative programs. This allows our patients to achieve far superior results compared to most other systems of care.

We only accept cases that we are confident we can help so please fill out the following information thoroughly so the doctor can let you know if you are a case we can accept. Please feel free to ask any questions if you need assistance. We look forward to serving you.

Have you ever been told or feel like you carry your head forward, noticed a rounding of your shoulders or a developing "hump" at the base of your neck? Yes No

HEALTH CONDITIONS

Abnormal postures and distortions are the result of trauma or stress to the body that have misaligned the vertebrae in your spine. When these vertebrae are twisted from their normal position, they will cause stress to the spinal cord and the delicate nerves that pass between the vertebrae. These misalignments are called **subluxations** (sub-lux-a-shuns). It has been extensively documented that subluxations, causing stress to your nerves, will weaken and distort the overall structure of your spine. This results in a weakened and distorted **POSTURE**. Postural distortions have many serious and adverse affects on your overall health. The most common and detrimental postural distortion is called **Forward Head Syndrome** (a “**hunched forward**” posture starting in the neck and progressively moving down your spine weakening the entire body). Please check any health condition you may be experiencing, now or in the past.
